

SMART START FOR BOYS

MENTORING YOUNG BOYS FOR LIFELONG SUCCESS

- This 4 hour workshop is based on developmental best practices for raising boys between **Birth to Kindergarten**, and is packed with down-to-earth, everyday examples and suggestions to optimally parent your son.
- Fee includes complementary copy of **Boys on Target: Raising Boys into Men of Courage and Compassion**

BOYS are much more vulnerable than girls early in life: they mature more slowly, get sick more often, and are less likely to have mastered the language, self-control, and fine motor skills necessary for a successful start in school.

BOYS are at greater risk than girls for most of the major learning and developmental disorders – as much as 4 times more likely to suffer from autism, attention deficit disorder, and dyslexia.

RATHER than supressing or disapproving boys' physicality, how can parents adapt to it and structure their environments so young boys can express this drive in safe, respectful ways?

HOW can parents support their active and exuberantly affectionate young son so he can settle himself to focus, and and soon learn how to read and eventually write?

HOW can we mentor young boys so their curiosity to explore, question, and wonder is nurtured as we also prepare them to thrive at school?

BARRY MACDONALD is a skilled educator, author, and Registered Clinical Counsellor, who will expertly lead you through the early corridors of boyhood. His highly practical and positive approach will inspire you to mentor your son to develop both his ingenuity and his integrity.

SMART START FOR BOYS

AGENDA

**BARRY MACDONALD
WILL TEACH YOU HOW
TO MENTOR YOUR
SON FOR LIFELONG
SUCCESS!**

MENTOR YOUR YOUNG SON FOR LIFELONG SUCCESS

- How can we manage boys' rough-and-tumble play, appreciating that it promotes physical strength, vents high energy, and teaches healthy social behaviour?
- How can we respond to a boy's tears to encourage a healthy emotional world?
- How can we encourage both competitive and cooperative social behaviours?
- How much free play and independence is enough? How much is too much?
- How can parents discourage hitting and provide boys with a verbal outlet for their frustrations?
- How can we encourage the language of caring while honouring a boy's drive for competition?
- Guns are a scary commodity, yet boys need to act out the roles of warriors, heroes, allies and leaders. How much play with toy guns is appropriate? When and how can this sort of play teach cooperation?
- When are video games good for young boys? When are they harmful?
- How do children learn to read and how can parents nurture readiness?
- How can parents avoid exaggerating gender differences and gender expectations that can lead boys themselves to believe outdated male stereotypes and limit their development?
- This workshop provides practical examples, hands-on demonstrations, and step-by-step guidance to optimally raise young boys and best mentor them for success at school - and life.

- In recent years, as academic expectations have intensified, a boy's slower start can extend into his school years, where boys trail girls in graduation rates, academic performance, and extracurricular leadership positions.
- We know that boys can have a tougher time than girls sitting still, writing and drawing, learning their letter sounds, and negotiating with the peers. How can parents best prepare their sons for the reality of schooling in the years leading up to Kindergarten?

Mentor your son to become a man of courage and compassion.

SMART START FOR BOYS
